RENOLD

reap the benefits

Agricultural chain industry

RENOLD AGRICULTURAL CHAIN

In today's world of sophisticated agricultural and processing equipment, the name RENOLD is the guarantee of outstanding quality and reliability. Renold have been designing and manufacturing chains since 1879, in collaboration with the leading manufacturers of crop harvesting and processing equipment. Engineering design detail and precision manufacturing techniques have earned Renold the ISO 9000 (BS 5750) quality assurance standards, resulting in a range of chains giving longer life under the most arduous conditions.

FUNCTIONS - AGRICULTURAL CHAIN

Renold chains are used on:

- Combine Harvesters
- Vegetable Grading Conveyors
- Grain Elevators
- Round Balers
- Circular Bale Unrollers
- Back-Feed Hoppers
- Box Scrapers
- Fruit Packing Conveyors

KEY FEATURES - AGRICULTURAL CHAIN

The standard range of Renold chain meets the majority of modern agricultural requirements.

However, with continually improving farming techniques and higher crop yields, Renold also offers a range of extra strength chains which are dimensionally identical to the standard range.

Heat treatment techniques are used to greatly enhance the breaking load and these chains have been adopted as a standard by major combine harvester manufacturers.

Being dimensionally the same as the standard chain, they are more cost effective by:

- Directly replacing standard chain using existing sprockets.
- Increased load handling capability.

These same advantages can also be realised when using extra strength chains to replace both malleable iron and pressed steel detachable link pintle chains.

RENOLD CA 550 AND CA 557 CHAIN

In addition to extra strength chains, Renold also offers the CA 550 and CA 557 straight side plate chain.

This chain, which complies with the American Standard, has become common place world-wide within the agricultural industry.

Many Renold customers fit this chain because of its robust construction and ability to cope with extremely abrasive conditions.

RENOLD WORKS STANDARD CHAIN

Renold works standard chains have been developed in close liaison with machinery manufacturers to fulfil specific requirements.

The works standard range also demonstrates the Renold commitment to continual chain development for the international agricultural industry.

RENOLD ATTACHMENTS AND SPROCKETS

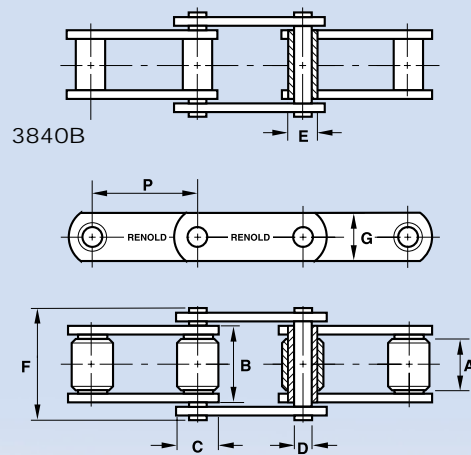

Our list of standard attachments is detailed for each chain shown in this section. Less common, made to order attachments are also available on request.

The popular standard sprockets for this range of chains are also detailed. Modifications to these standard sprockets, made to order and special sprockets are also available on request.

* SMALL SOLID SPROCKETS.

OTHER SPROCKETS AVAILABLE ON REQUEST.

SPROCKETS CAN BE MODIFIED ON REQUEST. WHEN KEYWAYS ARE REQUESTED, LARGE SPROCKETS ARE FACED BOTH SIDES OF THE BOSS -

SMALL SOLID SPROCKETS ARE FACED ON BOSS SIDE ONLY. SPROCKETS FOR OTHER SIZES OF CHAIN - DETAILS ON REQUEST.

ALSO AVAILABLE FROM **RENOLD**

PM SERIES

PM Series is a helical/worm geared motor unit available in seven unit sizes up to 90kW capacity. A wide range of mounting and shaft options are available.

The standard unit has ratios from 8:1 to 307:1 and when combined with RP Series Helical gear, offers ratios of up to 20,000:1.

PINFLEX COUPLING

A robust general purpose pin/buffer coupling providing reliable, fail-safe transmission of torque and misalignment capability.

- Steel half bodies, strong yet compact
- Polyurethane buffers, reliable/flexible and temperature resistant
- Torsionally flexible and shock-absorbing, extending machine life

SM SERIES

The SM Series speed reducers are available as single reduction units with 5:1 ratios and as double reduction units with ratios of 13:1, 20:1, 25:1.

Ten sizes are available up to 160kW capacity. Parallel and taper output shaft mounting are offered as standard.

TW SERIES

The TW Series range of 10" to 28" centres, heavy-duty worm units is available in single and double reduction types, ratios from 5:1 up to 4900:1, with input powers from 16 to 506kW.

HYDRASTART

The Hydrastart fluid coupling gives soft start speed and torque control on high inertia load applications. Standard fill and delay fill types are available, extending the acceleration time and further reducing the start up torque.

SPRAG CLUTCH

Sprag clutches are the solution for back stopping, indexing and over running applications.

The no backlash design gives positive connection between driver and driven components.

Torque capacities of over 800,000Nm are available, with bore sizes of 500mm.

SPROCKETS

Renold sprockets are the ideal solution for smooth chain operation. A range of standard and bespoke sprockets can be supplied on request.

- Renold also supply a range of chain tensioners, including the unique, innovative, Roll-Ring[®] self adjusting chain tensioner. Roll-Ring[®] is used extensively in smaller pitch chain drives, and is available for both BS and ANSI standards.

Unique quality and safety

RENOLD

'IN A CLASS OF ITS OWN'

Renold, the inventor of Bush Roller Chain has led the world in chain technology for more than a century.

Only products designed and supplied to our specification carry the MARK OF EXCELLENCE, 'RENOLD'. You can be sure that when you choose such a product, Renold Service, Quality, Value for Money and LONG LIFE PERFORMANCE are guaranteed.

Original patent drawing 1880

A UNIQUE SERVICE

Renold, the premier chain company is dedicated to providing national and global customers with products to the ultimate of specification and design, manufactured to exceed the highest international standards.

Investment in manufacturing and process technology, combined with an international sales and distribution network, places Renold's commitment to the development of chain products and customer service at the forefront of the industry. Renold's 16 national sales companies and over 70 country distributors around the world have direct access to extensive Renold design, test and manufacturing facilities, enabling the chain required to be promptly specified and produced. Renold, the power transmission specialists, provide a worldwide customer orientated product service.

CONSISTENCY

Only materials that meet the Renold exacting specifications are used for the manufacture of our chain components.

Continual investment in new technology demonstrates Renold's commitment to innovation. State of the art automatic assembly, ensures consistent quality of all Renold components.

Stringent process controls are in place at every stage of production. Every chain is proof loaded, resulting in minimum initial wear, greater fatigue resistance and improved wear performance.

Corrosion protection and long life are achieved by automatically pre-lubricating every chain with a specially formulated grease. Chain lubrication is one of the most important factors in achieving a long and trouble free service life. Renold can advise the correct method to suit your needs.

QUALITY

Our commitment to quality ensures that Renold Transmission and Conveyor Chain conforms to and surpasses the highest international standards of manufacture and design, including approval by the American Petroleum Institute.

All of our manufacturing systems conform to ISO9001.

Renold employees are fully trained to ensure all products meet the unique Renold specification.

We also manufacture to the specifications required by API, BAe, CAA, LONDON UNDERGROUND, ROLLS-ROYCE and JAGUAR.
